

## What the SGRA has achieved in 2007

We have vigorously campaigned against the proposed traffic plan for Ridgewood Gardens and William Street, advised Newcastle City Council that the mine shafts in the area needed to be addressed before a traffic management plan could be implemented.

The planters outside William Street flats were falling apart; these have now been replaced with four new ones. Thanks to Your Homes Newcastle.

The Association was approached by a resident at Mill-rise to ask for help with an objection to a proposed Telecommunications mast opposite Jewsons, the council turned this application down, the company has appealed against this.

The steps [Corporation Road to the Green] have also had new plants put in at the base and the bricks were concreted as well.
